DETAILED ACTION

Amendment

The amendment filed on December 27th 2005, has been entered into this application.

Examiner's Reasons for Allowance

Claims 1-21 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As to claims 1 and 14, the examiner agrees with the applicant arguments filed December 27th 2005 (page 2, line 13-page 3, line 1-8 and page 6, line 1-8) that the prior art of record, taken alone or in combination, fails to disclose or render obvious Wherein during the measuring procedure a standard calibration function (13) is combined with a scattering determination (14) and the results of the standard calibration function (13) as well as the output value of the scattering determination (14) are combined with each other by a combiner (16) according to an algorithm preset as an individual calibration function, an output value of the comparator (16) is combined with a measurement variable (17) and the combination of the output value of the combiner (16) and the measurement variable (17) yields the respective target quantity (18). Claims 2-13 and 15-21 are allowable by virtue of their dependency on claims 1 and 14.

Additional Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed in the attached form PTO-892 teach of other prior art method for controlling a device for measuring quantitative proportions of blood constituents.
